→ 65,000 picograms/liter

Hi Mark,

Another question: How low are the thresholds at which PCB levels can be detected?

Subject: Spokane Tribe fish consumption standards

Hi Mark,

Here are some initial questions about the new fish consumption standards adopted by the Spokane Tribe and approved by EPA:

- ✓ What were the old standards?
- ✓ How will this impact cleanup levels for the Spokane River, particularly PCBs?
- ✓ Where can I find comments on the new standards? (I'm assuming it went through some kind of public process, where dischargers had a chance to comment.) *Yes, send to her*
- ✓ I've also heard that the tribe sent a letter to EPA, indicating that the proposed Idaho discharge permits won't meet the new standards. Is that accurate?

Thanks,
